Page Scorecard

About SolCrys AI - AI Search and AEO Team

https://solcrys.com/about/

Template: blog

37
Poor

CATEGORY	SCORE	RATING	KEY FINDING
Content Quality	35	Poor	Word count: 222 (target: 800+). Well below minimum length for this content type.
Credibility	17	Critical	At 222 words, the threshold is d2 promotional phrases per 500 words (approximately d1 for this length). Promotional language includes: 'Request an audit' (CTA), 'SolCrys AI helps marketing teams monitor...' (repeated twice), 'so your team can prioritize the next pages to ship', and the entire final section is a promotional audit offer. Count: 5+ promotional phrases in 222 words, which exceeds >5 per 500 words threshold.
Technical Readability	58	Needs Work	Schema missing 4 fields: headline, author, datePublished, publisher
Discoverability	62	Needs Work	No machine-readable publish date found in JSON-LD or meta tags

* Overall score = Content Quality 30% + Credibility 35% + Technical Readability 20% + Discoverability 15%

Action Plan — 7 Actions, by Priority

Action 1

Impact: High Effort: Medium Per page (content-specific)

Add Source Links to Statistics and Claims

WHY IT MATTERS

AI engines weight cited claims higher than unsupported assertions when selecting answer sources.

CURRENT VS RECOMMENDED

ASPECT	CURRENT	RECOMMENDED
External citations	All 3 external links point to LinkedIn profiles (linkedin.com/in/gwenchenx/, linkedin.com/in/ea-son-wang/, linkedin.com/in/jia-c/)	Replace LinkedIn links with 3-5 authoritative industry sources (research publications, standards bodies, industry reports)
Claim: 'AI-generated answers add a new layer'	No source attribution	Link to the original research or industry publication that documents this trend
Claim: 'helps teams monitor mentions, citations, share of voice'	No source attribution	Link to the methodology or industry standard that defines these AEO metrics
Data density	0 sourced statistics in 222 words	Add at least 1 quantitative data point with source link (target: 1 per 300 words)

Add inline citation links to claims

HTML

<p>SolCrys AI was built by search, growth, data, and product operators to help brands connect AI visibility measurement with evidence-backed content action. AI-generated answers add a new layer where your content can rank, yet still be absent from the responses users see and trust.</p>

Add sourced statistic to strengthen credibility

HTML

<p>According to [INSERT SOURCE NAME], [INSERT STATISTIC ABOUT AI SEARCH ADOPTION OR CITATION IMPACT]. SolCrys AI helps marketing teams monitor mentions, citations, and share of voice across AI-generated answers.</p>

DEVELOPER NOTES

Content-specific fix. Work with editorial team to identify authoritative sources for each claim before adding links. Prioritize .edu, .gov, established industry publications, and original research over marketing blogs.

Action 2

Impact: High

Effort: Low

All blog pages (template-level)

Add Structured Data Markup (JSON-LD)

WHY IT MATTERS

AI engines use schema fields to identify content type, authorship, and freshness signals.

CURRENT VS RECOMMENDED

ASPECT	CURRENT	RECOMMENDED
Schema type	AboutPage, Organization, BreadcrumbList	Add Article or BlogPosting schema (blog template requires one of: BlogPosting, Article, NewsArticle)
Required schema fields	Missing: headline, author, datePublished, publisher	Add all 4 required fields to Article schema
Machine-readable publish date	No datePublished in JSON-LD or meta tags	Add datePublished and dateModified in both JSON-LD and <meta> tags

Add complete Article schema with required fields

JSON

```
{
  "@context": "https://schema.org",
  "@type": "Article",
  "headline": "About SolCrys AI - AI Search and AEO Team",
  "author": {
    "@type": "Organization",
    "name": "SolCrys AI",
    "url": "https://solcrys.com"
  },
  "publisher": {
    "@type": "Organization",
    "name": "SolCrys AI",
    "logo": {
      "@type": "ImageObject",
      "url": "[INSERT LOGO URL]"
    }
  },
  "datePublished": "[INSERT PUBLISH DATE IN ISO 8601 FORMAT]",
  "dateModified": "[INSERT LAST MODIFIED DATE IN ISO 8601 FORMAT]",
  "mainEntityOfPage": {
    "@type": "WebPage",
    "@id": "https://solcrys.com/about/"
  },
  "description": "[INSERT META DESCRIPTION]",
  "image": "[INSERT IMAGE URL]"
}
```

Add meta tags for publish date

HTML

<meta property="article:published_time" content="[INSERT PUBLISH DATE IN ISO 8601 FORMAT]" />
<meta property="article:modified_time" content="[INSERT LAST MODIFIED DATE IN ISO 8601 FORMAT]" />

DEVELOPER NOTES

Template-level fix. Implement in blog template so all future pages inherit correct schema. Use CMS fields to populate datePublished (creation date) and dateModified (last edit date) dynamically.

Action 3

Impact: Medium

Effort: Medium

Per page (content-specific)

Add Expert Quotes or Third-Party Validation

WHY IT MATTERS

AI engines prioritize content with attributed expert statements over unattributed company claims.

CURRENT VS RECOMMENDED

ASPECT	CURRENT	RECOMMENDED
Expert quotes	0 expert quotes (page contains only company descriptions and team member titles)	Add 1-2 attributed quotes from industry experts or third-party validation (blog template requires 1+ if author is expert; 2+ if ghostwritten)
Third-party validation	No external expert statements, no attributed quotes from industry figures	Include customer testimonials, analyst quotes, or industry expert commentary on AI search trends

Add attributed expert quote with citation

HTML

```
<blockquote>
<p>"[INSERT EXPERT QUOTE ABOUT AI SEARCH OR AEO TRENDS]"</p>
<footer>— <cite>[INSERT EXPERT NAME], [INSERT TITLE] at [INSERT ORGANIZATION]</cite> (<a href="[INSERT SOURCE URL]" rel="noopener" target="_blank">source</a></footer>
</blockquote>
```

DEVELOPER NOTES

Content-specific fix. Source quotes from customer case studies, industry analyst reports, or interviews with recognized AEO/search experts. Ensure attribution includes full name, title, and organization.

Action 4

Impact: Medium

Effort: Low

Per page (content-specific)

Expand Meta Descriptions

WHY IT MATTERS

AI engines use meta descriptions to understand page context when generating answer summaries.

CURRENT VS RECOMMENDED

ASPECT	CURRENT	RECOMMENDED
Meta description length	112 characters	Expand to 140-160 characters with standalone context about what SolCrys AI does and who it serves
Meta description content	[CURRENT META DESCRIPTION NOT PROVIDED IN EVIDENCE]	Include key value proposition: 'SolCrys AI helps marketing teams monitor brand mentions, citations, and share of voice in AI-generated search answers. Built by search and product operators.'

Expanded meta description with standalone context

HTML

```
<meta name="description" content="SolCrys AI helps marketing teams monitor brand mentions, citations, and share of voice in AI-generated search answers. Built by search, growth, and product operators." />
```

DEVELOPER NOTES

Content-specific fix. Ensure meta description can stand alone without page title context. Include target audience (marketing teams) and core value proposition.

Action 5

Impact: Medium

Effort: Medium

Per page (content-specific)

Add Comparison Tables

WHY IT MATTERS

AI engines extract structured table data directly into answer formats and comparison responses.

CURRENT VS RECOMMENDED

ASPECT	CURRENT	RECOMMENDED
Founding team presentation	Three co-founders (Gwen Chen, Eason Wang, Jia Chang) listed as text with titles and backgrounds	Convert to HTML table with columns: Name, Role, Background, LinkedIn
Data tables	0 tables present	Add at least 1 structured table (founding team is the natural candidate on this page)

Convert founding team to structured table

HTML

```
<table>
<thead>
<tr>
<th>Name</th>
<th>Role</th>
<th>Background</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gwen Chen</td>
<td>[INSERT ROLE FROM PAGE]</td>
<td>[INSERT BACKGROUND FROM PAGE]</td>
</tr>
<tr>
<td>Eason Wang</td>
<td>[INSERT ROLE FROM PAGE]</td>
<td>[INSERT BACKGROUND FROM PAGE]</td>
</tr>
<tr>
<td>Jia Chang</td>
<td>[INSERT ROLE FROM PAGE]</td>
<td>[INSERT BACKGROUND FROM PAGE]</td>
</tr>
</tbody>
</table>
```

DEVELOPER NOTES

Content-specific fix. Extract existing founding team text into table format. Ensure table has proper <thead> and <tbody> structure for accessibility and AI parsing.

Action 6

Impact: Medium

Effort: Low

Per page (content-specific)

Add or Update Publication Date

WHY IT MATTERS

AI engines deprioritize undated content when freshness signals are missing from metadata.

CURRENT VS RECOMMENDED

ASPECT	CURRENT	RECOMMENDED
datePublished	None found in JSON-LD or meta tags	Add datePublished in ISO 8601 format to JSON-LD schema and article:published_time meta tag
dateModified	None found in JSON-LD or meta tags	Add dateModified in ISO 8601 format to JSON-LD schema and article:modified_time meta tag

Add publish and modified dates to existing schema

JSON

```
{
"@context": "https://schema.org",
"@type": "Article",
```

```
"datePublished": "[INSERT PUBLISH DATE, e.g. 2026-04-15T10:00:00Z]",
"dateModified": "[INSERT LAST MODIFIED DATE, e.g. 2026-04-29T14:30:00Z]"
}
```

DEVELOPER NOTES

Template-level fix if using CMS; content-specific if static. Set datePublished to original publish date and update dateModified whenever content changes. Ensure dates are within 12 months for maximum freshness score.

Action 7

Impact: **Medium**

Effort: **Medium**

Per page (content-specific)

Reduce Promotional Language

WHY IT MATTERS

AI engines penalize promotional density when selecting neutral, informative answer sources.

CURRENT VS RECOMMENDED

ASPECT	CURRENT	RECOMMENDED
Promotional phrase count	5+ promotional phrases in 222 words (exceeds threshold of d2 per 500 words)	Reduce to d1 promotional phrase for this length (approximately d2 per 500 words)
Promotional phrases to remove/rewrite	'Request an audit' (CTA), 'SolCrys AI helps marketing teams monitor...' (repeated twice), 'so your team can prioritize the next pages to ship', entire final section is promotional audit offer	Move CTA to sidebar or footer; consolidate repeated product descriptions; rewrite final section to focus on industry context rather than audit offer

Rewrite promotional final section to informative context

HTML

```
<!-- BEFORE (promotional): -->
<h2>Find out where your brand is missing, miscited, or misrepresented.</h2>
<p>SolCrys AI helps marketing teams monitor mentions, citations, and share of voice in AI-generated answers, so your team can prioritize the next pages to ship. Request an audit.</p>

<!-- AFTER (informative): -->
<h2>Measuring AI search visibility</h2>
<p>As AI-generated answers become the primary search interface, brands need systematic methods to track where they appear, how they're cited, and whether the information is accurate. Monitoring these signals helps teams identify content gaps and prioritize updates.</p>
```

DEVELOPER NOTES

Content-specific fix. Separate promotional CTAs from informational content. Consider moving 'Request an audit' to a persistent sidebar element rather than inline in body copy.
